Subject Index of Volume 56

Aluminium
corrosion behaviour of W-implanted aluminium in carbonate and sulphate solutions, 75
deposition of AlN films onto Fe–Al–Mn alloys by reactive r.f. magnetron sputtering, 51
mechanical properties and oxidation–corrosion behavior of AlN-coated Fe–Al–Mn alloys, 61
thermomechanical experiments and numerical simulation of ceramic coatings, 151
Aluminized coatings
interdiffusion of aluminized and Pt-aluminized coatings on MAR-M247 superalloy, 81
Argon
C-excess silicon carbide deposition from pyrolysis of tetramethylsilane, 243

Boride coatings
microstructure, wear resistance and erosion resistance of plasma-sprayed boride coatings, 225
Borides
mechanical properties of vanadized boride layer on steel, 71
Brass substrates
corrosion behaviour of TiN and Sn coatings deposited onto brass substrates for electrical contact interfaces, 249

Carbides
Al_2O_3-coated cemented carbides: optimization of structure, number of layers and type of interlayer, 89
reactive sputtering in the ABS™ system, 179
Carbon
C-excess silicon carbide deposition from pyrolysis of tetramethylsilane, 243
effects of C on tribological properties and microstructure of Ti-implanted H-13 steel, 137
Carbon films
effects of N + B ion implantation on the tribological behaviour of GCr15 bearing steel, 119
Chemical vapour deposition
factors influencing the κ-$Al_2O_3 \rightarrow \alpha$-$Al_2O_3$ phase transformation during CVD growth, 165
tribological behaviour of CVD diamond films on various cutting tools, 105
Coating density
effect of coating density on the strain tolerance of corrosion resistant amorphous silica, 267
Cobalt
interdiffusion of aluminized and Pt-aluminized coatings on MAR-M247 superalloy, 81
tribological behaviour of CVD diamond films on various cutting tools, 105
Copper
investigation of composition of Ag, Ni and Ag–Ni pseudo-alloy coatings applied by electrospark alloying on a Cu substrate, 131
Copper films
an r.f. ion beam source and direct ion beam deposition of large surface area thin Cu films on polycrystalline glass, Al_2O_3 and ZrO_2 substrates, 157
Corrosion
applications of coatings in coal-fired energy systems, 185
corrosion behaviour of TiN and Sn coatings deposited onto brass substrates for electrical contact interfaces, 249
corrosion behaviour of W-implanted aluminium in carbonate and sulphate solutions, 75
mechanical properties and oxidation–corrosion behaviour of AlN coated Fe–Al–Mn alloys, 61
effect of coating density on the strain tolerance of corrosion resistant amorphous silica, 267
Critical strain
measurement of the critical strain energy release rate of plasma-sprayed coatings, 19
Cutting tools
tribological behaviour of CVD diamond films on various cutting tools, 105

Deposition
C-excess silicon carbide deposition from pyrolysis of tetramethylsilane, 243
deposition of AlN films on Fe–Al–Mn alloys by reactive r.f. magnetron sputtering, 51
Deposition phenomena
analysis of deposition phenomena and residual stress in plasma spray coatings, 27
Diamond films
tribological behaviour of CVD diamond films on various cutting tools, 105
Diamond-like carbon
commercial applications of ion beam deposited diamond-like C (DLC) coatings, 273

Electrospark alloying
investigation of composition of Ag, Ni and Ag–Ni pseudo-alloy coatings applied by electrospark alloying on a Cu substrate, 131
Erosion
applications of coatings in coal-fired energy systems, 185
microstructure, wear resistance and erosion resistance of plasma-sprayed boride coatings, 225

Friction
a concept for friction mechanisms of coated surfaces, 1
effects of N + B ion implantation on the tribological behaviour of GCr15 bearing steel, 119
prediction of friction coefficient for polymer-coated mechanical elements, 39

Hard coatings
a concept for friction mechanisms of coated surfaces, 1

Ion beam deposition
an r.f. ion beam source and direct ion beam deposition of large surface area thin Cu films on polycrystalline glass, Al_2O_3 and ZrO_2 substrates, 157
commercial applications of ion beam deposited diamond-like C (DLC) coatings, 273
Ion bombardment
changes in surface composition induced by ion bombardment of multicomponent alloys, 233
Ion implantation
annealing behaviour of H13 steel implanted with N, Ti and Ti + N, 143

© 1993 – Elsevier Sequoia. All rights reserved

effects of N + B ion implantation on the tribological behaviour of GCr15 bearing steel, 119
microstructure of the near-surface layers of ion-implanted polycrystalline Cu, 11
observation of deep dislocation structures and "long-range effect" in ion-implanted α-Fe, 97
Iron
Al_2O_3-coated cemented carbides: optimization of structure, number of layers and type of interlayer, 89
laser alloying on a cast iron surface with W–V–Co–Cr alloying powder, 47
observation of deep dislocation structures and "long-range effect" in ion-implanted α-Fe, 97

Laser deposition
tribological behaviour of TiC thin films grown by pulsed laser deposition (PLD), 125
Laser methods
laser alloying on a cast iron surface with W–V–Co–Cr alloying powder, 47

Magnesium Zirconate
thermomechanical experiments and numerical simulation of ceramic coatings, 151
Magnetrons
deposition of AlN films onto Fe–Al–Mn alloys by reactive r.f. magnetron sputtering, 51
mechanical properties and oxidation–corrosion behaviour in AlN coated Fe–Al–Mn alloys, 61
Microfilms
a concept for friction mechanisms of coated surfaces, 1

Nickel
investigation of composition of Ag, Ni and Ag–Ni pseudo-alloy coatings applied by electrospark alloying on a Cu substrate, 131
structure, hardness and adhesion in electroless nickel interlayer modified TiN coating on mild steel, 257
Nitrogen
annealing behaviour of H13 steel implanted with N, Ti and Ti + N, 143

Oxidation
Al_2O_3-coated cemented carbides: optimization of structure, number of layers and type of interlayer, 89
mechanical properties and oxidation–corrosion behavior in AlN coated Fe–Al–Mn alloys, 61
Plasma-sprayed coatings for titanium alloy oxidation protection, 109
Oxides
modelling of porosity of plasma sprayed materials, 199

Phase transformations
factors influencing the κ-$Al_2O_3 \rightarrow \alpha$-$Al_2O_3$ phase transformation during CVD growth, 165
Plasma spraying
analysis of deposition phenomena and residual stress in plasma spray coatings, 27
modelling of porosity of plasma sprayed materials, 199
thermal cycling life of plasma-sprayed yttria-stabilized zirconia coatings, 215
plasma-sprayed coatings for titanium alloy oxidation protection, 109
measurement of the critical strain energy release rate of plasma-sprayed coatings, 19
Plastic deformation
observation of deep dislocation structures and "long-range effect" in ion-implanted α-Fe, 97
Polymers
prediction of friction coefficient for polymer-coated mechanical elements, 39
Porosity
modelling of porosity of plasma sprayed materials, 199

Radio frequency
deposition of AlN films on Fe–Al–Mn alloys by reactive r.f. magnetron sputtering, 51
mechanical properties and oxidation–corrosion behavior in AlN coated Fe–Al–Mn alloys, 61
Residual stress
analysis of deposition phenomena and residual stress in plasma spray coatings, 27

Scanning electron microscopy
mechanical properties of vanadized boride layer on steel, 71
tribological behaviour of TiC thin films grown by pulsed laser deposition (PLD), 125
Silica substrates
factors influencing the κ-$Al_2O_3 \rightarrow \alpha$-$Al_2O_3$ phase transformation during CVD growth, 165
Silicon carbide
C-excess silicon carbide deposition from pyrolysis of tetramethylsilane, 243
Silver
investigation of the composition of Ag, Ni and Ag–Ni pseudo-alloy coatings applied by electrospark alloying on a Cu substrate, 131
Sn coatings
corrosion behaviour of TiN and Sn coatings deposited onto brass substrates for electrical contact interfaces, 249
Sputtering
reactive sputtering in the ABS™ system, 179
Steel
annealing behaviour of H13 steel implanted with N, Ti and Ti + N, 143
effects of C on tribological properties and microstructure of Ti-implanted H-13 steel, 137
effects of N + B ion implantation on the tribological behaviour of GCr15 bearing steel, 119
mechanical properties of vanadized boride layer on steel, 71
structure, hardness and adhesion in electroless nickel interlayer modified TiN coating on mild steel, 257
texture in the δ-($FeZn_{10}$) phase formed in galvanneal coatings, 209
Strain tolerance
effect of coating density on the strain tolerance of corrosion resistant amorphous silica, 267
Stress measurement
observation of deep dislocation structures and "long-range effect" in ion-implanted α-Fe, 97

Thermal shock
thermomechanical experiments and numerical simulation of ceramic coatings, 151
Thermal shock resistance
thermal cycling life of plasma-sprayed yttria-stabilized zirconia coatings, 215
Thin films
tribological behaviour of TiC thin films grown by pulsed laser deposition (PLD), 125
TiN coatings
corrosion behaviour of TiN and Sn coatings deposited onto brass substrates for electrical contact interfaces, 249

reactive sputtering in the ABS™ system, 179
structure, hardness and adhesion in electroless nickel interlayer modified TiN coating on mild steel, 257
Titanium
annealing behaviour of H13 steel implanted with N, Ti and Ti + N, 143
effects of C on tribological properties and microstructure of Ti-implanted H-13 steel, 137
plasma-sprayed coatings for titanium alloy oxidation protection, 109
texture in the δ-($FeZn_{10}$) phase formed in galvanneal coatings, 209
Transmission electron microscopy
annealing behaviour of H13 steel implanted with N, Ti and Ti + N, 143
microstructure of the near-surface layers of ion-implanted polycrystalline Cu, 11
texture in the δ-($FeZn_{10}$) phase formed in galvanneal coatings, 209
Tungsten
corrosion behaviour of W-implanted aluminium in carbonate and sulphate solutions, 75
Wear
effects of C on tribological properties and microstructure of Ti-implanted H-13 steel, 137
microstructure, wear resistance and erosion resistance of plasma sprayed boride coatings, 225
tribological behaviour of TiC thin films grown by pulsed laser deposition (PLD), 125
X-ray diffraction
analysis of deposition phenomena and residual stress in plasma spray coatings, 27
effects of C on tribological properties and microstructure of Ti-implanted H-13 steel, 137
texture in the δ-($FeZn_{10}$) phase formed in galvanneal coatings, 209
Zirconia coatings
thermal cycling life of plasma-sprayed yttria-stabilized zirconia coatings, 215
